

On or about January 3<sup>rd</sup>, 2005, Philip D. Ray stated to me that over 200,000,000 bytes of information were deleted of the computer system. I confirmed this information by looking at the server's program: VERITAS. The activity history on such program shows that 6,355,844,799 bytes were counted and backed up as of December 30<sup>th</sup>, 2004. In the history as of January 3<sup>rd</sup>, 2005, only 6,140,247,255 bytes were counted and backed up.
